

## ART AND DESIGN

We aim to provide children with a broad and balanced experience in all areas of the Arts. The emphasis on Art is about children developing holistically, practically and creatively. Exploration is a valuable learning experience as it allows children to achieve a deeper knowledge and understanding of what they are doing and gain many different skills. We will give children the opportunities to explore and develop their ideas, investigate and make in art, craft and design, evaluate and develop their work and be taught about visual and tactile elements and the differences and similarities in the work of artists, craftspeople and designers or different times and cultures.

	AUTUMN	SPRING	SUMMER
