

GEOGRAPHY

At Kirkby-in-Malhamdale Primary school we believe:
 Geography is a subject which is full of excitement and dynamism that helps us to better understand the world, its people, places and environments- and the interactions between them. Geography also helps us understand how and why places are changing and to help us better imagine, predict and work towards likely and preferred futures. Underpinning all of this is a strong spatial component that deepens our understanding of what places are like, why and how they are connected and the importance of location.

YEAR A	AUTUMN	SPRING	SUMMER
YEAR A CLASS 1	Continents and Oceans – Africa (Kenya)	Scotland	Locality Study – 150 th anniversary of School
